2013 CLEAN LABEL LAUNCHES AS % OF ALL FOOD PRODUCT LAUNCHES²

NOVATION®
functional native food starches

Add product appeal,
Inside and out

Your consumers are looking for front-of-pack claims and ingredient lists that reassure them of quality and a great eating experience. NOVATION functional native starches deliver on all fronts—and have done so for more than 20 years.

Now you can position more products as clean label than ever before—even products that were formerly impossible with a clean label, such as dairy desserts, retorted soups, spoonable dressings and premium ready meals.

Process tolerance and stability

How? Our portfolio of more than 35 functional native starches offers texturizers that allow your products to conquer extreme processing conditions and withstand multiple freeze-thaw cycles. Our innovators continue to push native starches to perform like modified starches—but with just "starch" on the label and no e-numbers.

Documented non-GMO

Of course, you have the assurance of non-GMO quality worldwide. We've built a trusted supply chain for ingredients that pass muster with the European Union. And we've enrolled NOVATION starches in the U.S.-based Non-GMO Project. Our decade-old TRUETRACE® program in the U.S. tracks NOVATION ingredients every step of the way.

Legacy of success

When you use NOVATION functional native starches, you're in great company. They are the foundation of billions of dollars of food and beverage products sold worldwide over the last 20 years. Make your new product the next clean label success story.
