RE: Lot Number interpretation Erysta® C40 and C100 Crystalline Erythritol

The lot number for **Erysta® C40 and C100 Crystalline Erythritol** products is based on the production date, production line and shift. The first 2 digits indicate the year of production, followed by 2 digits indicating the month of production, followed by 2 digits indicating the date of production, followed by the number 7 which indicates the production line, followed by 1 digit which indicates the shift on which the product was produced.

For example, if the lot number is 19110571:

19 indicates the year 2019

11 indicates the month of November

05 indicates the date of production

7 indicates the Erythritol production line

1 indicates first shift

Please advise if additional information is required.
